

MARCOS ROSTAN

AI Engineer | LLM Engineer

Buenos Aires, Argentina · rostanmarcos@gmail.com · +54 9 11 2255-4663 · linkedin.com/in/marcosrostan · github.com/MarcosRos002

Work authorization: Argentina, Uruguay (Mercosur) · Languages: Spanish (native), English (B2)

SUMMARY

AI Engineer focused on production agentic systems, RAG pipelines, and LLM-powered automation. Currently shipping multi-agent applications with Claude, LangGraph, and the Model Context Protocol (MCP) at Move Group. 3+ years of prior experience automating data workflows and integrating systems in healthcare. B.Sc. Data Science candidate at Universidad de Buenos Aires (UBA).

EXPERIENCE

AI Engineer / LLM Engineer, Move Group

Jun 2025 – Present

- Built a Claude-based analytical agent (62 tools, 40+ data sources, 260M+ docs) used daily by Move's analyst team and select clients, replacing manual cross-database research and ad-hoc analyst reports. Engineered its multi-step agentic loop, dynamic Haiku/Sonnet cost routing by query complexity, and parallel tool-call dispatch.
- Shipped a hybrid RAG service on pgvector (vector + full-text fusion, LLM-driven re-ranking via Claude Haiku) replacing manual catalog lookups with natural-language queries over an internal survey corpus. Deployed via FastAPI with LangSmith tracing and P50/P95/P99 latency metrics.
- Designed a two-pass LLM classification pipeline (Claude Haiku to Sonnet by confidence threshold) plus a Groq Whisper ASR layer, automating the audit of 200 weekly survey audios (~7 min each) and replacing ~23 hours of weekly manual review. Orchestrated via Celery/Redis with SHA256 dedup.

Software Engineer, R&D (Freelance), CetApp Go

Mar 2026 – Present

- Ship full-stack features for a multi-tenant HSE SaaS platform (20+ modules) through agile sprints with CI/CD, applying Claude Code-assisted development to compress feature implementation cycles.
- Co-developed the Environmental Impact Assessment feature, converting a manual spreadsheet workflow into a guided web flow with draft and finalize states, removing manual paperwork for field supervisors.

Data Analyst & Automation Engineer, Sanatorio Clínica Modelo de Morón

Mar 2022 – Jul 2025

- Built ETL pipelines (Python + SQL) and automated dashboards consolidating data across multiple hospital systems for the Billing and IT areas, eliminating 20+ hours/week of manual reporting effort.
- Engineered a FastAPI webhook service integrating internal surveys (PostgreSQL) with WhatsApp delivery via Botmaker, designed for idempotency and exactly-once reward issuance under concurrent webhooks.
- Developed an internal secure file-storage platform (FastAPI + AWS S3) with presigned-URL uploads supporting files up to 5 GB, role-based authorization, encryption at rest, and Cloudflare Tunnel exposure (zero inbound ports).
- Prototyped the organization's first GenAI use cases by integrating LLM APIs (Claude/OpenAI) for document parsing and text classification.

EDUCATION

Universidad de Buenos Aires (UBA) — B.Sc. Data Science (in progress)

Apr 2022 – Jul 2027 (expected)

Instituto La Salette — Electronics Technician (6-year program)

2016 – 2021

CERTIFICATIONS

- Claude Code in Action — Anthropic Education (Feb 2026)
- Prompt Engineering — Platzi (Jan 2026)
- Claude Code — Platzi (Feb 2026)
- Advanced Algorithms: Graphs & Trees — Platzi (Jan 2026)

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript, Bash

LLM & GenAI: Anthropic Claude, OpenAI, Gemini, Grok APIs; LangChain, LangGraph, LangSmith, Claude Agent SDK, Model Context Protocol (MCP); prompt engineering, LLM evaluation

RAG & Vector DBs: pgvector, Chroma, Pinecone; embeddings, semantic search, hybrid retrieval, re-ranking

ML & Deep Learning: scikit-learn, XGBoost, LightGBM, PyTorch, TensorFlow

Data Engineering: pandas, NumPy, Airflow, ETL pipelines, web scraping, Streamlit

Backend: FastAPI, Flask, Nginx, Celery, REST APIs, webhooks

MLOps & DevOps: Docker, Kubernetes, GitHub Actions (CI/CD), systemd, Prometheus, Grafana

Cloud & Databases: AWS (EC2, S3, Lambda), GCP, Azure DevOps, PostgreSQL, MySQL, MongoDB, Redis
